Market Update: Interest Rates

We use the 364-day T- Bill as an indicator of how interest rates move

364-day T-bill: Since 01 Jan 2015

Note: Past performance is not an indication of future performance

364-day T-bill: Since 01 Jan 2023

Note: Past performance is not an indication of future performance

Major events during the month

- Inflation remains negative at present mainly due to repeated reductions in electricity tariffs and fuel prices. Deflationary conditions are expected to gradually ease from 2nd half of 2025, with inflation projected to turn positive by mid-2025 according to CBSL.
- Foreign inflows to the government securities market have risen recently reflecting improved confidence. Increased net foreign purchases by the Central Bank and the receipt of the fourth tranche of the IMF-EFF programme.

Inflation: Since 01 Jan 2015

Market Update: Stock Market

- SAMPATH BANK PLC
- CARGILLS (CEYLON) PLC

Highlights of the month

- The ASPI and S&P SL20 grew by -0.09% and -3.98% respectively, for the month of April 2025.
- Net foreign flows for the month amounted to LKR 800 Mn of inflows, an increased inflow from the prior period.
- The market has witnessed increased turnover for the period compared to the prior period.

 **Investment strategy:** AIA Sri Lanka maintains a prudent investment strategy for its investment portfolios, in line with its investment philosophy and guidelines as set out in the investment policy. The Company advocates a long-term investment strategy supporting long-term growth. The equity strategy is driven by in-depth research with emphasis on growth and sustainability of earnings whilst principles such as liquidity, solvency and corporate governance also play a significant role in stock selection.

Fixed income outlook

- The Central Bank did not conduct a monetary policy review in April, resulting in the Overnight Policy Rate (OPR) remaining unchanged at 8.00%. Accordingly, The Standing Lending Facility Rate (the rate CBSL lends to commercial banks) remained at 8.5% and the Standing Deposit Facility Rate (the rate which commercial banks place their excess cash with CBSL) was at 7.5% during the month.
- The treasury bill yields increased across all tenures in April. The benchmark 364-day T-bill yield increased by 4 basis points to 8.29% from the preceding month, whilst the 91-day Yield increased even further by 12 basis points, which brought the yields up to 7.62%. The 182-day tenor yields increased the most, which recorded a 14-basis point increase bringing the rate to 7.98%.
- In April, Treasury bill yields climbed across the curve, reflecting renewed market caution and shifting liquidity dynamics. The benchmark 364-day yield inched up by 4 basis points, finishing the month at 8.29%, a modest advance. Shorter dated paper experienced even greater upward pressure as the 91-day yield jumped 12 basis points to 7.62%, underscoring heightened demand for near term funding. Meanwhile, the 182-day tenor led the movement, surging 14 basis points to 7.98%.
- Foreign holdings of LKR-denominated Government securities marginally declined in April, registering an outflow of LKR 3,016 billion which was a 3.2% decline from the preceding month. This decreased foreign participation to 0.49% of total outstanding government securities.
- The average weighted Prime Lending Rate (AWPR) marginally declined by 4 basis points to 8.39% by the last week of April from the preceding month.
- The deflationary trend continued into April 2025, however, the rate of deflation eased to -2.0% (Y-o-Y) in April 2025, an improvement from -2.6% recorded in the previous month. A rise in the price of certain food items and the positive base effect from last year contributed to this moderation in the deflation rate. Food inflation (Y-o-Y) increased to 1.3% in April 2025 from 0.6% in March 2025 while Non-Food inflation (Y-o-Y) improved to -3.6% in April 2025 from to -4.1% observed in March 2025.

Equity outlook

- The Colombo Stock Exchange experienced a marginal decline in the month of April, with the All-Share Price Index (ASPI) easing by 0.09%, while the S&P SL20 Index recorded a higher decrease of 1.92%. The decline in the market was primarily driven by the Banking sector, with additional pressure from the Telecommunications sector. The counters that contributed to the downward movement included Sampath Bank, Commercial Bank, LOLC Holdings, Hatton National Bank, and Lion Brewery respectively.
- Despite the overall dip in indices, market activity showed notable improvement, with average daily turnover increasing by 20% compared to the previous month, reaching LKR 2.54 billion. April marked a positive shift in foreign investor sentiment, recording a net foreign inflow of LKR 800 million, the first such net inflow for the year, reducing the year-to-date net foreign outflow to LKR 10 billion. The market's Price-to-Earnings (P/E) ratio marginally increased to 8.39 from 8.30 by the end of April, suggesting a marginal increase in market valuations from the preceding month.

FREQUENTLY ASKED QUESTIONS

■ Where are AIA Unit Linked Funds invested?

The Unit Linked funds are invested in instruments specified in the policy documents i.e. government securities, debt securities and money market investments such as fixed deposits, etc, and in shares listed on the Colombo Stock Exchange. These investments are made within the parameters provided in the policy documents, in order to achieve the investment objective of each fund.

- **Equities:** Investment in shares listed on the Colombo Stock Exchange.
- **Debt Securities:** Investments in Treasury instruments, Corporate Debt instruments, repurchase agreements of Treasury instruments and Corporate Debt instruments of longer maturity tenor than those classified as Money Market investments.
- **Money Market investments:** Funds held as Corporate Debt instruments, overnight repurchase agreements of Treasury instruments, Corporate Debt instruments with a tenor of one day, investments in Treasury instruments and cash in bank current accounts.

Treasury instruments refers to instruments such as Treasury Bills and Treasury Bonds issued by the government of Sri Lanka. Corporate debt refers to debt instruments issued by financial institutions and companies.

■ How does AIA manage Unit Linked funds?

AIA maintains a prudent investment strategy for its investment portfolios, in line with its investment philosophy and guidelines, as set out in the Company's investment policy. The investments of each fund are carried out in line with the investment objectives of the respective fund. The Company advocates a long-term investment strategy supporting long-term growth. The equity strategy is driven by in-depth research with emphasis on growth and sustainability of earnings whilst principles such as liquidity, solvency and corporate governance also play a significant role in stock selection.

■ Why do unit prices of the Growth & Balanced Funds fluctuate in comparison to the other Unit Linked Funds?

The prices of all unit linked funds move in tandem with the price movements or market values of their underlying investments. The Growth & Balanced funds invest in shares listed on the Colombo Stock Exchange. As prices of shares can be volatile at times, the unit prices of Growth & Balanced funds too can move higher or lower in tandem with these movements in share prices.

■ Is the All Share Price Index (ASPI) or S&P20 movement comparable with AIA Growth & Balanced Funds Performance?

The Growth and Balance fund performance may differ from the performances of the ASPI and the S&P SL 20 stock indices due to the fund portfolios holding different stocks and different proportions of stocks when compared to those used in the computation of the indices. The ASPI measures the movement of share prices of all listed companies on the Colombo Stock Exchange based on market capitalization and the S&P SL 20 measures the movement of share prices of 20 of the leading companies selected and rebased on certain criteria including market capitalisation.

*Subject to Policy conditions
Terms and Conditions apply

For more information, please call AIA Insurance on
011 2 310 310 or visit www.aialife.com.lk

■ What are the Investment Strategies mentioned in the Policy Document* ?

Depending on the policy you have purchased, at the date of commencement the policy owner selects the investment strategy out of the four available; namely Aggressive, Moderate, Cautious and Advanced. Aggressive, Moderate and Cautious strategies have their funds allocated and switched at predetermined milestones depending on the policy term. Policy owners can switch fund strategies on written request during the policy period subject to conditions. Policy owners with Advanced investment strategy are responsible for determining the allocation and switching throughout the lifetime of the policy.

■ What are Unit switches and amendment of Regular Premium Allocation Proportions?

Depending on the policy you have purchased, your Investment Linked Long Term Insurance Policy allows you to be in control of your investments. Options such as Unit switches* and amendment of Regular Premium Allocation Proportions* may be available to you, so that you have total control over your long term investment.

- **Unit switches:** If you request to switch units from one unit linked fund to another, the Company will cancel units of equal amount from the fund from which the units are to be switched from at the Unit price of that fund prevailing on the day and after deduction of switching charge, if any, and the funds so generated will be used to create units in the fund in which the amount is to be switched to at the Unit price of that fund prevailing on the day. Note that the unit switches are not permitted into or out of the Protected Fund and Stable Money Market Fund.
- **Amendment of Regular Premium Allocation Proportions:** At the written request of the Policy Owner, the Company will amend the Allocation Proportion whereafter the previous Allocation Proportion will become ineffective, and the amended Allocation Proportion will be applicable to all future Basic Premiums received from the date of the Company's acceptance of the request. Note that the amendment of allocation proportions is not permitted into or out of the Stable Money Market Fund.

■ How often can Unit switches and Amendment of Allocation Proportions be executed?

- There is no limitation on frequency of Unit switches*
- The Company will only allow two (2) requests for Amendment of the Allocation Proportion within any Policy Year*
- The relevant applicable charges will be applied as stipulated in the Policy Document

■ How can we get information on AIA Unit Linked Funds performance?

- Visit AIA Sri Lanka corporate website to view 'AIA Investor' for fund performance updates and details: <https://www.aialife.com.lk/en/help-support/our-unit-linked-fund-performance.html>.
