# Market Update: Interest Rates

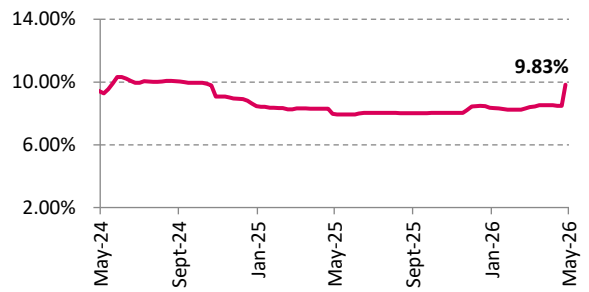

We use the 364-day T-Bill as an indicator of how interest rates move

## 364-day T-bill: Since 01 Jan 2016

Note: Past performance is not an indication of future performance

## 364-day T-bill: Since 01 Jan 2024

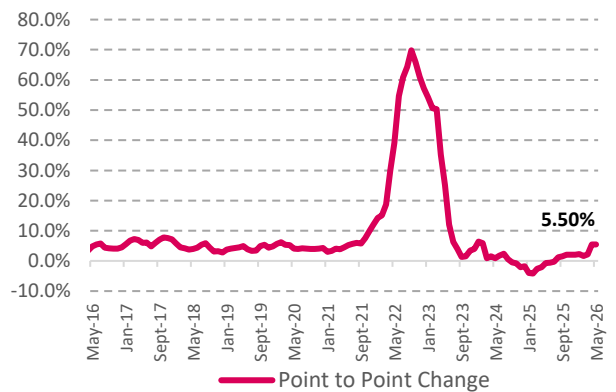

Note: Past performance is not an indication of future performance

## Major events during the month

- Throughout May, 364-day T-bill rates remained stable around 8.52%, before easing to 8.49% and rising sharply to 9.83% by month-end, following the CBSL policy rate hike. The movements reflected tightening liquidity conditions and investor caution amid market uncertainty.
- Sri Lanka's external sector remained stable in May, with tourism earnings improving year-on-year and worker remittances strengthening amid lingering geopolitical tensions in the Middle East, maintaining a cautious external environment.

## Inflation: Since 01 Jan 2016

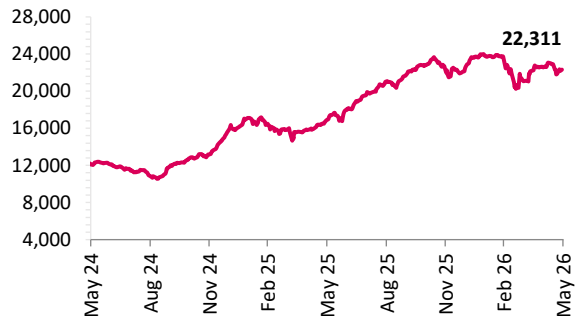

# Market Update: Stock Market

## ASPI Movement: Since 01 Jan 2016

## ASPI Movement: Since 01 Jan 2024

## S&P SL Movement: Since 01 Jan 2016

## S&P SL Movement: Since 01 Jan 2024

Year	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026**
ASPI	6,228	6,369	6,052	6,129	6,774	12,226	8,490	10,654	15,945	22,624	22,311

Market Capitalization (LKR Billions)	8,175	8,116
PE Ratio (times)	11.57x	11.37x

### 10 Companies with highest market

#### Capitalisation on the CSE as of month end

- DIALOG AXIATA PLC
- JOHN KEELLS HOLDINGS PLC
- CEYLON TOBACCO COMPANY PLC
- COMMERCIAL BANK OF CEYLON PLC
- L O L C HOLDINGS PLC
- DISTILLERIES COMPANY OF SRI LANKA PLC
- MELSTACORP PLC
- HAYLEYS PLC
- HATTON NATIONAL BANK PLC
- CARGILLS (CEYLON) PLC

### Highlights of the month

- The ASPI and S&P SL 20 decreased by 1.06% and 0.78% respectively, for the month of May 2026.
- Net foreign outflows for the month amounted to LKR 7.32 Bn, an increased outflow from the prior period.
- The market witnessed an increase in turnover for the period compared to the prior period.

 **Investment strategy:** AIA Sri Lanka maintains a prudent investment strategy for its investment portfolios, in line with its investment philosophy and guidelines as set out in the investment policy. The Company advocates a long-term investment strategy supporting long-term growth. The equity strategy is driven by in-depth research with emphasis on growth and sustainability of earnings whilst principles such as liquidity, solvency and corporate governance also play a significant role in stock selection.

### Fixed income outlook

- Sri Lanka's fixed income market came under renewed pressure in May as the Central Bank tightened monetary policy in response to rising inflation risks, external sector pressures and increased import demand.
- At its third monetary policy review for the year, the Central Bank increased the Overnight Policy Rate (OPR) by 100 basis points to 8.75%. Consequently, the Standing Lending Facility Rate (SLFR) rose to 9.25%, while the Standing Deposit Facility Rate (SDFR) increased to 8.25%.
- The policy rate hike was mainly driven by rising risks to price stability. Higher global oil prices, largely due to geopolitical tensions in the Middle East, led to upward adjustments in domestic fuel and electricity prices. This contributed to inflation rising marginally above the Central Bank's medium-term target of 5%. At the same time, credit-driven imports, particularly vehicle imports, added pressure on the external sector and contributed to rupee depreciation, creating further inflationary risks. Accordingly, the Central Bank appears to have tightened monetary policy to contain second-round effects from energy price increases and anchor inflation expectations.
- Treasury bill yields moved sharply higher across all three maturities during the month, reflecting the market's adjustment to tighter monetary conditions. The 182-day Treasury bill yield recorded the largest increase, rising by 143 basis points to 9.68%. The 364-day Treasury bill yield increased by 131 basis points to 9.83%, while the 91-day Treasury bill yield rose by 116 basis points to 9.36%. The broad-based upward shift indicates firmer market expectations for higher short-term interest rates.
- Foreign participation in LKR-denominated government securities weakened during May. Foreign investors recorded net sales of LKR 10.7 billion, reducing foreign holdings by 7.5% during the month. As a result, foreign holdings declined to 0.72% of total LKR-denominated government securities, compared with 0.77% in the previous month. On a year-to-date basis, the market shifted from net foreign purchases up to April to a net foreign outflow of LKR 7.9 billion by end-May.
- The tightening in monetary conditions also began to transmit to lending rates. The Average Weighted Prime Lending Rate (AWPR) increased by 33 basis points during the month, reaching 9.90% by end-May.
- The Colombo Consumer Price Index (CCPI) recorded year-on-year inflation of 5.5% in May 2026, marking its highest level since February 2024. The increase was mainly driven by non-food inflation, which rose to 7.8% from 6.8%, reflecting higher fuel and electricity prices. In contrast, food inflation eased to 0.9% from 2.8%, supported by lower prices of coconuts and vegetables.
- Overall, May marked a clear shift toward tighter fixed income market conditions. Higher policy rates, rising treasury bill yields, weaker foreign participation and elevated inflation point to a more cautious interest rate environment. Going forward, the direction of the market will largely depend on the persistence of inflationary pressures, energy price movements, credit growth, exchange rate stability and the Central Bank's ability to keep inflation expectations anchored around the 5% target.

### Equity outlook

- The Colombo Stock Exchange closed in May in negative territory, with market weakness broad-based across several key sectors. The All Share Price Index (ASPI) declined by 238 points, or 1.0%, while the more liquid and large-cap focused S&P SL 20 index fell by 0.78%. The relatively smaller decline in the S&P SL 20 suggests that selling pressure was more pronounced across the border market than among large-cap counters.
- The market pullback was mainly driven by weakness in the Consumer Durables & Apparel, Banking and Diversified Financials sectors, which collectively accounted for a significant share of the index decline. Selling pressure also extended to the Insurance and Retailing sectors, indicating that the downturn was broad-based rather than concentrated in a single sector. At the counter level, the largest negative contributors to the index were Ambeon Holdings, DFCC Bank and Central Finance.
- Despite the decline in prices, investor participation remained broadly in line with the previous month, with average daily turnover amounting to LKR 3.65 billion. However, foreign investors continued to be net sellers of Sri Lankan equities, recording a net foreign outflow of LKR 7.32 billion during May. This brought the cumulative net foreign outflow for the year to LKR 38.55 billion.
- Market valuations also moderated during the month. The market Price-to-Earnings (P/E) ratio declined to 11.37x in May from 11.57x in the preceding month, reflecting the fall in share prices during the period.
- Overall, May reflected a cautious equity market environment, with broad-based sector weakness, continued foreign selling and a modest decline in market valuations. While domestic investor participation remained relatively steady, the sustained foreign outflows and weakness across key sectors weighed on overall market sentiment.

## FREQUENTLY ASKED QUESTIONS

### Where are AIA Unit Linked Funds invested?

The Unit Linked funds are invested in instruments specified in the policy documents i.e. government securities, debt securities and money market investments such as fixed deposits, etc, and in shares listed on the Colombo Stock Exchange. These investments are made within the parameters provided in the policy documents, in order to achieve the investment objective of each fund.

- **Equities:** Investment in shares listed on the Colombo Stock Exchange.
- **Debt Securities:** Investments in Treasury instruments, Corporate Debt instruments, repurchase agreements of Treasury instruments and Corporate Debt instruments of longer maturity tenor than those classified as Money Market investments.
- **Money Market investments:** Funds held as Corporate Debt instruments, overnight repurchase agreements of Treasury instruments, Corporate Debt instruments with a tenor of one day, investments in Treasury instruments and cash in bank current accounts.

Treasury instruments refers to instruments such as Treasury Bills and Treasury Bonds issued by the government of Sri Lanka. Corporate debt refers to debt instruments issued by financial institutions and companies.

### How does AIA manage Unit Linked funds?

AIA maintains a prudent investment strategy for its investment portfolios, in line with its investment philosophy and guidelines, as set out in the Company's investment policy. The investments of each fund are carried out in line with the investment objectives of the respective fund. The Company advocates a long-term investment strategy supporting long-term growth. The equity strategy is driven by in-depth research with emphasis on growth and sustainability of earnings whilst principles such as liquidity, solvency and corporate governance also play a significant role in stock selection.

### Why do unit prices of the Growth & Balanced Funds fluctuate in comparison to the other Unit Linked Funds?

The prices of all unit linked funds move in tandem with the price movements or market values of their underlying investments. The Growth & Balanced funds invest in shares listed on the Colombo Stock Exchange. As prices of shares can be volatile at times, the unit prices of Growth & Balanced funds too can move higher or lower in tandem with these movements in share prices.

### Is the All Share Price Index (ASPI) or S&P20 movement comparable with AIA Growth & Balanced Funds Performance?

The Growth and Balance fund performance may differ from the performances of the ASPI and the S&P SL 20 stock indices due to the fund portfolios holding different stocks and different proportions of stocks when compared to those used in the computation of the indices. The ASPI measures the movement of share prices of all listed companies on the Colombo Stock Exchange based on market capitalization and the S&P SL 20 measures the movement of share prices of 20 of the leading companies selected and rebased on certain criteria including market capitalisation.

011 2 310 310 or visit [www.aialife.com.lk](http://www.aialife.com.lk)

## ▪ What are the Investment Strategies mentioned in the Policy Document\* ?

Depending on the policy you have purchased, at the date of commencement the policy owner selects the investment strategy out of the four available; namely Aggressive, Moderate, Cautious and Advanced. Aggressive, Moderate and Cautious strategies have their funds allocated and switched at predetermined milestones depending on the policy term. Policy owners can switch fund strategies on written request during the policy period subject to conditions. Policy owners with Advanced investment strategy are responsible for determining the allocation and switching throughout the lifetime of the policy.

## ▪ What are Unit switches and amendment of Regular Premium Allocation Proportions?

Depending on the policy you have purchased, your Investment Linked Long Term Insurance Policy allows you to be in control of your investments. Options such as Unit switches\* and amendment of Regular Premium Allocation Proportions\* may be available to you, so that you have total control over your long term investment.

- **Unit switches:** If you request to switch units from one unit linked fund to another, the Company will cancel units of equal amount from the fund from which the units are to be switched from at the Unit price of that fund prevailing on the day and after deduction of switching charge, if any, and the funds so generated will be used to create units in the fund in which the amount is to be switched to at the Unit price of that fund prevailing on the day. Note that the unit switches are not permitted into or out of the Protected Fund and Stable Money Market Fund.
- **Amendment of Regular Premium Allocation Proportions:** At the written request of the Policy Owner, the Company will amend the Allocation Proportion whereafter the previous Allocation Proportion will become ineffective, and the amended Allocation Proportion will be applicable to all future Basic Premiums received from the date of the Company's acceptance of the request. Note that the amendment of allocation proportions is not permitted into or out of the Stable Money Market Fund.

## ▪ How often can Unit switches and Amendment of Allocation Proportions be executed?

- There is no limitation on frequency of Unit switches\*
- The Company will only allow two (2) requests for Amendment of the Allocation Proportion within any Policy Year\*
- The relevant applicable charges will be applied as stipulated in the Policy Document

## ▪ How can we get information on AIA Unit Linked Funds performance?

- Visit AIA Sri Lanka corporate website to view 'AIA Investor' for fund performance updates and details: <https://www.aialife.com.lk/en/help-support/our-unit-linked-fund-performance.html>.
- Our new and improved AIA Customer Portal is accessible in all three languages. Simply visit our AIA corporate website and register for free and access your policy details from the comfort of your own home, at any time ([aialife.com.lk](http://aialife.com.lk)). **Accessing unit price updates, policy information and receiving real-time updates are the benefits of availing the customer portal.**
- If you wish to receive the daily unit prices via SMS, kindly contact us on our hotline or via the customer portal and we will make necessary arrangements for you to receive the daily SMS. We would also appreciate if you could notify us of any changes to your contact details.
