Market Update: Interest Rates

We use the 364-day T- Bill as an indicator of how interest rates move

364-day T-bill: Since 01 Jan 2016

Note: Past performance is not an indication of future performance

364-day T-bill: Since 01 Jan 2024

Note: Past performance is not an indication of future performance

Major events during the month

- Throughout July, 364-day T-bill rates remained broadly stable around 10.20% throughout the month, reflecting market consolidation following earlier adjustments to tighter monetary conditions after the CBSL policy rate hike. The movements reflected liquidity conditions and sustained investor demand.
- Sri Lanka's external sector remained broadly stable in July, with tourist arrivals improving month-on-month. Worker remittances recorded thus far in 2026 continued to show positive momentum, supporting external sector resilience.

Inflation: Since 01 Jan 2016

Market Update: Stock Market

ASPI Movement: Since 01 Jan 2016

ASPI Movement: Since 01 Jan 2024

S&P SL Movement: Since 01 Jan 2016

S&P SL Movement: Since 01 Jan 2024

ASPI and S&P SL 20 Performance (as a percentage)

Note: past performance is not an indication of future performance

*The S&P SL20 index was introduced on 18 June 2012. Inclusions in the S&P 20 index are rebalanced on a bi-annual basis.

Highlights of the performance

- The annual average growth rate of ASPI is 11.6% per year and S&P SL20 index is 5.4% per year, since the unit linked funds were first started.
- The ASPI and S&P SL 20 have decreased by 6.6% and 3.5% respectively year to date.

Market Update: Stock Market

10 Companies with highest market

Capitalisation on the CSE as of month end

- DIALOG AXIATA PLC
- JOHN KEELLS HOLDINGS PLC
- CEYLON TOBACCO COMPANY PLC
- COMMERCIAL BANK OF CEYLON PLC
- DISTILLERIES COMPANY OF SRI LANKA PLC
- L O L C HOLDINGS PLC
- MELSTACORP PLC
- HAYLEYS PLC
- HATTON NATIONAL BANK PLC
- LOLC FINANCE PLC

Highlights of the month

- The ASPI and S&P SL 20 decreased by 5.09% and 4.27% respectively, for the month of July 2026.
- Net foreign outflows for the month amounted to LKR 2.17 Bn, an increased outflow from the prior period.
- The market witnessed a decrease in turnover for the period compared to the prior period.

 **Investment strategy:** AIA Sri Lanka maintains a prudent investment strategy for its investment portfolios, in line with its investment philosophy and guidelines as set out in the investment policy. The Company advocates a long-term investment strategy supporting long-term growth. The equity strategy is driven by in-depth research with emphasis on growth and sustainability of earnings whilst principles such as liquidity, solvency and corporate governance also play a significant role in stock selection.

Fixed income outlook

- Sri Lanka's fixed income market remained broadly stable during July 2026, with movements across the yield curve reflecting a combination of unchanged monetary policy, easing geopolitical risk perceptions, stronger foreign participation in government securities, and a further acceleration in headline inflation. While short-term treasury yields eased marginally, lending rates continued to move upward, highlighting the ongoing transmission of the Central Bank's earlier monetary policy tightening into broader market interest rates.
- The Central Bank of Sri Lanka (CBSL) did not conduct a monetary policy review during July, leaving the overnight policy rate (OPR) unchanged at 8.75%. Accordingly, the standing lending facility rate (SLFR), at which the CBSL provides overnight liquidity to commercial banks, remained at 9.25%, while the standing deposit facility rate (SDFR), applicable to excess funds placed by commercial banks with the CBSL, remained at 8.25%. The absence of a policy review provided a relatively stable monetary policy backdrop during the month.
- Against this backdrop, treasury bill yields displayed mixed movements across the three standard maturities. The 91-day treasury bill recorded the largest adjustment, declining by 28 basis points to 9.86%, while the 182-day yield remained broadly unchanged and the 364-day yield edged higher by 3 basis points. The moderation at the shorter end of the yield curve partly reflected an easing of the geopolitical risk premium as financial markets increasingly adjusted to the prevailing situation in the Gulf. As concerns surrounding the conflict became more normalized, the additional risk premium embedded in shorter-term government securities eased, supporting the decline in the 91-day yield.
- Foreign investor participation in the government securities market also strengthened significantly during July. Foreign holdings of LKR-denominated government securities increased by approximately 39.0% during the month, supported by net purchases of around LKR 52.9 billion. Consequently, the foreign ownership share of outstanding LKR-denominated government securities increased to approximately 1.01%, from 0.74% in the preceding month. On a year-to-date basis, foreign investors recorded cumulative net purchases of approximately LKR 47.5 billion, indicating a gradual improvement in foreign investor appetite for Sri Lankan government securities.
- Meanwhile, the Average Weighted Prime Lending Rate (AWPR) increased by 28 basis points during July to reach 10.67% by month-end. The continued increase in the AWPR suggests that the impact of the earlier monetary policy tightening is gradually transmitting into commercial lending rates, even as short-term government securities yields showed some moderation.
- Inflation accelerated to 7.3% YoY in July 2026 from 6.8% in June, marginally exceeding the upper end of the CBSL's target band. However, the increase remained concentrated rather than broad-based, with core inflation contained at around 4.4%. The rise was driven mainly by transport, food and housing, which together contributed approximately 5.8 percentage points to headline inflation. Transport remained the largest contributor, while food inflation accelerated to 6.3% from 3.6%. Despite the higher headline reading, underlying price momentum remained relatively moderate, supported by easing non-food inflation and softer transport costs during the month. This suggests that the recent increase largely reflects category-specific pressures and base effects, with food, transport and utility prices remaining the key near-term inflation risks.

Equity outlook

- The Colombo Stock Exchange weakened notably in July 2026, with broad –based selling pressure across sectors, softer investor participation and continued foreign outflows weighing on market performance. The All Share Price Index (ASPI) declined by 1,134.07 points, or 5.1%, while the S&P SL20 Index fell by 265.07 points, or 4.3%, indicating weakness across both the broader market and large-cap counters.
- The market decline was led primarily by the Banking sector, followed by Capital Goods and Diversified Financials, which exerted the largest negative contributions to the ASPI. While all sectors contributed negatively during the month, Commercial & Professional Services, Household & Personal Products, Automobiles & Components, and Software & Services had comparatively limited downside impact. At the individual counter level, heavyweight banking stocks, particularly Hatton National Bank and Sampath Bank, were among the key contributors to the decline, while Haycarb and LOLC Finance provided only marginal positive support.
- Investor participation also moderated during July, with average daily turnover declining by approximately 21% to LKR 1.79 billion compared with the preceding month. Foreign investors remained net sellers, recording a net outflow of LKR 2.2 billion during July, taking the cumulative foreign net outflow for the year to approximately LKR 42 billion.
- The market correction also resulted in a moderation in valuations, with the market Price-to-Earnings (P/E) ratio declining to 11.18x from 11.72x in June. Overall, July reflected a period of broad market consolidation, characterized by pressure on heavyweight financial counters, weaker trading activity and continued foreign selling, while the decline in valuations provided some improvement in the market's relative valuation backdrop.

FREQUENTLY ASKED QUESTIONS

■ Where are AIA Unit Linked Funds invested?

The Unit Linked funds are invested in instruments specified in the policy documents i.e. government securities, debt securities and money market investments such as fixed deposits, etc, and in shares listed on the Colombo Stock Exchange. These investments are made within the parameters provided in the policy documents, in order to achieve the investment objective of each fund.

- **Equities:** Investment in shares listed on the Colombo Stock Exchange.
- **Debt Securities:** Investments in Treasury instruments, Corporate Debt instruments, repurchase agreements of Treasury instruments and Corporate Debt instruments of longer maturity tenor than those classified as Money Market investments.
- **Money Market investments:** Funds held as Corporate Debt instruments, overnight repurchase agreements of Treasury instruments, Corporate Debt instruments with a tenor of one day, investments in Treasury instruments and cash in bank current accounts.

Treasury instruments refers to instruments such as Treasury Bills and Treasury Bonds issued by the government of Sri Lanka. Corporate debt refers to debt instruments issued by financial institutions and companies.

■ How does AIA manage Unit Linked funds?

AIA maintains a prudent investment strategy for its investment portfolios, in line with its investment philosophy and guidelines, as set out in the Company's investment policy. The investments of each fund are carried out in line with the investment objectives of the respective fund. The Company advocates a long-term investment strategy supporting long-term growth. The equity strategy is driven by in-depth research with emphasis on growth and sustainability of earnings whilst principles such as liquidity, solvency and corporate governance also play a significant role in stock selection.

■ Why do unit prices of the Growth & Balanced Funds fluctuate in comparison to the other Unit Linked Funds?

The prices of all unit linked funds move in tandem with the price movements or market values of their underlying investments. The Growth & Balanced funds invest in shares listed on the Colombo Stock Exchange. As prices of shares can be volatile at times, the unit prices of Growth & Balanced funds too can move higher or lower in tandem with these movements in share prices.

■ Is the All Share Price Index (ASPI) or S&P20 movement comparable with AIA Growth & Balanced Funds Performance?

The Growth and Balance fund performance may differ from the performances of the ASPI and the S&P SL 20 stock indices due to the fund portfolios holding different stocks and different proportions of stocks when compared to those used in the computation of the indices. The ASPI measures the movement of share prices of all listed companies on the Colombo Stock Exchange based on market capitalization and the S&P SL 20 measures the movement of share prices of 20 of the leading companies selected and rebased on certain criteria including market capitalisation.

*Subject to Policy conditions
Terms and Conditions apply

For more information, please call AIA Insurance on
011 2 310 310 or visit www.aialife.com.lk

■ What are the Investment Strategies mentioned in the Policy Document* ?

Depending on the policy you have purchased, at the date of commencement the policy owner selects the investment strategy out of the four available; namely Aggressive, Moderate, Cautious and Advanced. Aggressive, Moderate and Cautious strategies have their funds allocated and switched at predetermined milestones depending on the policy term. Policy owners can switch fund strategies on written request during the policy period subject to conditions. Policy owners with Advanced investment strategy are responsible for determining the allocation and switching throughout the lifetime of the policy.

■ What are Unit switches and amendment of Regular Premium Allocation Proportions?

Depending on the policy you have purchased, your Investment Linked Long Term Insurance Policy allows you to be in control of your investments. Options such as Unit switches* and amendment of Regular Premium Allocation Proportions* may be available to you, so that you have total control over your long term investment.

- **Unit switches:** If you request to switch units from one unit linked fund to another, the Company will cancel units of equal amount from the fund from which the units are to be switched from at the Unit price of that fund prevailing on the day and after deduction of switching charge, if any, and the funds so generated will be used to create units in the fund in which the amount is to be switched to at the Unit price of that fund prevailing on the day. Note that the unit switches are not permitted into or out of the Protected Fund and Stable Money Market Fund.
- **Amendment of Regular Premium Allocation Proportions:** At the written request of the Policy Owner, the Company will amend the Allocation Proportion whereafter the previous Allocation Proportion will become ineffective, and the amended Allocation Proportion will be applicable to all future Basic Premiums received from the date of the Company's acceptance of the request. Note that the amendment of allocation proportions is not permitted into or out of the Stable Money Market Fund.

■ How often can Unit switches and Amendment of Allocation Proportions be executed?

- There is no limitation on frequency of Unit switches*
- The Company will only allow two (2) requests for Amendment of the Allocation Proportion within any Policy Year*
- The relevant applicable charges will be applied as stipulated in the Policy Document

■ How can we get information on AIA Unit Linked Funds performance?

- Visit AIA Sri Lanka corporate website to view 'AIA Investor' for fund performance updates and details: <https://www.aialife.com.lk/en/help-support/our-unit-linked-fund-performance.html>.
